DETAILED ACTION

Examiner's amendment

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Patrick Low on August 4, 2004.

In claim 14, on line 5: --1-- has been inserted after "of claim".

Double Patenting

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970);and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 1-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-14 of U.S. Patent No. 6,710,363 B1. The dependent claims 2-14 of the application are identical to claims 2-14 of the patent. Although the independent claim 1 of the application is not identical to claim 1 of the patent, the claims are not patentably distinct from each other and claim common subject matter, as follows:

They both claim the use of a miniaturized lamp having a light-emitting diode (LED) and that the miniaturized lamp is sized to facilitate maneuvering inside an engine compartment and around an air-conditioning system or refrigeration system.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Kalley et al. (5,959,306 and 5,674,000) disclose a light source for examining leak detection sites in ventilating and air conditioning systems using a fluorescent dye. Cooper et al. (6,767,110 B2 and 6,491,408 B1) disclose an inspection lamp kit including a pen-size lamp for detecting fluorescent leak detection materials.
